

Schwab Trading Bot System Update

Generated 2026-06-29 09:24:29 local. Scope: auth refresh, all-sleeves freshness/activation, and changes since the prior update request.

Current State

Surface	Status	Evidence
Schwab auth	READY	lease=healthy; token_expires_in=1,436.608s; broker_auth=True; network=True; findings=0
All sleeves	READY	launcher=10/101; missing=0; exited=91; child_process_count=103
Watchdog	READY	grade=A; healthy_targets=4/4; alerts=0; restart_storms=0
Guarded paper	READY	strict_all_clear=True; live_execution=blocked_read_only
Storage and ingestion	STABLE	pressure_index=0.001; pending=78/15000; oldest_pending=0s
Collection	READY	collectors=24; bots_with_observations=24; observations=1596

What Changed

- Refreshed Schwab auth through the supervisor path. The final artifact is ready, broker/auth/network are OK, and findings are empty.
- Verified the token path and auth lease. Current lease is healthy; token was not extended because it was still considered fresh by the refresh guard.
- Started the all-sleeves paper/read-only stack and let the launcher fan out completely. Final launcher health is 101 expected jobs, 101 running, zero missing, zero exited.
- Patched the process watchdog so Music playback soft pause no longer suppresses read-only sleeve collection when the creative pause contract has terminate_processes=false.
- Added regression coverage for soft Music playback versus hard music/audio pause behavior.
- Ran the watchdog again after the patch; final process watchdog is ready with grade A, all four targets healthy, no alerts, and no restart storms.

Auth Notes

- Final supervisor timestamp: 2026-06-29T13:22:58.061730+00:00.
- Auth lease: healthy; broker ready/auth/network all report true.
- A forced interactive browser refresh was attempted earlier but did not complete; it was not required for the final ready state.
- The standing recommendation remains to keep browser-assisted auth fallback available if future silent refresh stops extending the lease.

Sleeve Activation Notes

- Launcher phase=running, overall_status=degraded.
- Process watchdog sees all_sleeves parent live, child fanout OK, and heartbeat fresh.
- Music is still active as a co-tenant app, but the pause contract is soft: hard_pause.terminate_processes=false and audio_regression_guard_active=false.
- Coinbase loop and Coinbase futures loop were also restored by the watchdog and are healthy in the final process snapshot.

Remaining Caveats

- Live execution remains intentionally locked. The current ready state is guarded paper/read-only collection, not live order execution.
- Adaptive regression guard remains blocked: active=9, persistent=6, critical=1.
- System drift guard remains blocked: blocked=3, degraded=15, stale=13.
- The final health-fast snapshot is still ready/strict all clear; the remaining drift surfaces are maintenance and governance freshness issues, not blockers to sleeves being active now.

Top Adaptive Items

- guard:runtime_paper_regression_guard: degraded - overall_status=ready stale age_minutes=504.5
- guard:stateful_storage_regression_guard: degraded - overall_status=ready stale age_minutes=513.9

- guard:source_verification_contract: degraded - status=degraded total_sources=16 unverified=5 degraded=5 stale=5
- guard:livefeed_visibility_contract: degraded - guard=ready running=True alive=True writer_mode=local_mirror failed_routes=0
- guard:memory_truth_contract: degraded - efficiency=degraded pressure=degraded swap=ready raw_swap=0.906 effective_swap=0.906 reconciliation=False
- guard:runtime_storage_contract: blocked - runtime=degraded storage=ready pending=78/15000 compute=high memory=normal
- guard:ingestion_storage_degradation_floor: degraded - storage=ready pressure=0.001 pending=78/15000 oldest=0.0/240.0s quality=100.0

Top Drift Items

- command_validity: blocked - blocked_entries=105 smoke_failures=1 runtime_smoke_failures=22 operator_gated=2
- codex_project_guard: degraded - ready stale_minutes=494.88
- section_grade_guard: degraded - ready stale_minutes=493.77
- grade_regression_guard: degraded - degraded stale_minutes=494.66
- adaptive_regression_guard: blocked - blocked
- one_numbers_regression_guard: degraded - ready stale_minutes=494.88
- report_pdf_bundle: degraded - ready stale_minutes=552.39
- architecture_upgrade_scoreboard: degraded - degraded

Verification

- pytest tests/test_process_watchdog_creative_pause.py: 3 passed.
- python -m py_compile scripts/ops/process_watchdog.py: passed.
- process-watchdog final: ready, grade A, healthy target count 4/4.
- health-fast final after watchdog: ready, strict_all_clear=true, guarded paper ready.
